## **MMI – Position: Performance Analyst**

**Performance Analyst-** Central, OH - Base commensurate with experience plus Bonus and relo

The performance analyst will be a key contributor to a team that will focus on performance reporting, tuning and capacity planning for a UNIX and Windows environment. Focus will include web analytics, network devices, the enhancement of existing performance reporting methodologies, capacity modeling and the delivery of meaningful dashboard reports. Emphasis will be on working with business units to identify tuning opportunities such as server consolidation as well as the enhancement of enterprise wide performance reporting. The individual will search for opportunities to improve and enhance functionality, stability and usability of servers, networks, and storage. Will work to create partnerships with business units to enhance the value of the performance analysis process.

### **Requirements:**

Looking for a skilled performance/capacity analyst who has both high technical competency but also strong business, communication and written skills. Must have worked as a performance/capacity analyst with distributed operating systems, architecture and methodologies. Someone with previous experience tuning large environments and enhancing enterprise performance reporting.

Please contact MMI if you have interest or pass on to a colleague
